PARKWAY EAST HOSPITAL

A COMPLETE EXPERIENCE

A private general acute care hospital located in the eastern region of Singapore, the Parkway East Hospital is a one-stop facility that serves through a team of dedicated medical professionals and specialists who are committed to produce quality clinical, service and operational outcomes. Aiming to serve with excellence, the Parkway East Hospital is on a continuous drive to integrate value for patients, making a difference in their lives.

ABOUT PARKWAY EAST HOSPITAL

Parkway East Hospital serves on the eastern coast of Singapore, with a facility of 118 beds. Located just 15 minutes away from Singapore Changi Airport, the Hospital caters to both local and foreign patients.

The private general acute care hospital has a comprehensive range of clinical disciplines and sub-specialities and is highly regarded in Obstetrics & Gynaecology, General Surgery, Orthopaedics, Ear, Nose & Throat (ENT) and Ophthalmology. Various ancillary services such as rehabilitation therapy, radiology and imaging are available as well.

Parkway East Hospital is one of the three hospitals under ParkwayHealth in Singapore. Hospitals and medical care centres under ParkwayHealth are reputed for quality and service. This is the result of quality clinical outcomes and comprehensive care, made achievable with an extensive network of hospitals, integrated healthcare facilities and over 40 years of experience in hospital development.

ParkwayHealth seeks to be the global leader in value-based integrated healthcare. Leveraging on its pursuit for excellence in patient care, comprehensive clinical programmes and facilities, ParkwayHealth strives to meet patients' standards through quality healthcare.

PERSONALISED CARE FOR OUR PATIENTS

Parkway East Hospital is known for offering personalised care and user-friendly services at a convenient location, building a loyal niche among residents in Eastern Singapore and the region.

To bring healthcare services closer to our patients in the heartlands, Parkway East Hospital also has a satellite clinic, the Parkway East Specialist Centre, located at Bedok Central.

COMMITTED TO SAFETY & QUALITY PATIENT CARE

At Parkway East Hospital, our team of doctors and nurses are passionate about their roles and are constantly ensuring that patients are well taken care of. Having maintained good standards in our safety and patient care practices, Parkway East Hospital has been awarded with a Joint Commission International (JCI) accreditation, a US-based standard for patient and staff safety that is recognised worldwide. On top of that, the Hospital has been accorded with a Singapore Quality Class certification as a testament of our commitment towards excellence.

A ONE-STOP FACILITY

Apart from the clinical disciplines and sub-specialities, Parkway East Hospital provides diagnostic and therapeutic radiology services to help determine the best possible treatment options. Having these services under one roof allows for a holistic experience at just one stop.

Parkway East Hospital also consists of a Laboratory Services department to facilitate the conducting of routine and required tests. Having such a facility enhances the efficiency of the diagnosis and treatment process.

EMERGENCY CARE ROUND THE CLOCK

In order to provide immediate medical attention to critical cases, the hospital also extends its round the clock medical care service through its 24-hour Accident & Emergency facility, providing care for life-threatening emergencies as well as minor urgent-care medical problems.

OUR FACILITIES & SERVICES

Within Parkway East Hospital is a comprehensive range of facilities and services that will cater to patients' diverse needs. The hospital is supported by a multi-disciplinary team of specialists and backed by medical technology.

Emergency

- 24-hour Accident & Emergency

- Mammogram
- Radiography
- Ultrasound

Rehabilitation Therapy Services

- Occupational Therapy
 - Design / Fabrication of Splints and Orthosis
 - Hand Therapy
 - Home Evaluation / Modifications
 - Prescription of Aids / Appliances
- Physiotherapy
 - Arthritis Management
 - Back / Neck Care
 - Cardiorespiratory Physiotherapy
 - Neuro-rehabilitation
 - Post Orthopaedic Surgery Management
 - Prenatal Programme
 - Sports Injuries

Speech Therapy

- Neuro-rehabilitation Programme
- Speech and Language Management

Renal Dialysis

OUR KEY SPECIALITIES

EXTENSIVE SPECIALITY CARE FOR OUR EXCLUSIVE PATIENTS

Parkway East Hospital specialises in various key areas which together, form a comprehensive umbrella of medical services. These speciality programmes are tailored carefully and managed by accredited medical specialists who are in turn supported by a well-trained team of nurses and other allied health professionals.

OUR KEY SPECIALITIES

MUSCULOSKELETAL

Orthopaedics is a branch of medicine focused on injuries to the musculoskeletal system, including spine and joint injuries or deformities. The team dedicated to musculoskeletal injuries is made up of professionals who hail from multiple disciplines, including orthopaedic surgeons, physiologists and occupational therapists. This multi-disciplinary line-up offers a complete care package for related ailments which may range from sports injuries to hip or joint replacement.

Committed to offering quality care in this area, our medical specialists apply minimally invasive techniques to reduce trauma and scarring while improving the rate of success. Common orthopaedics ailments, including spinal problems, have been treated successfully through these methods.

OUR KEY SPECIALITIES

OPHTHALMOLOGY AND EAR, NOSE & THROAT (ENT)

The well-being of our senses is very crucial to our general health. At Parkway East Hospital, there is a team of ophthalmologists and otorhinolaryngologists who are specialists in the areas of eye, ear, nose and throat diseases. Their specialised skills treat primary care problems such as cataracts and snoring disorders to more complicated cases, for adults and children alike.

Our medical professionals conduct standard testing procedures to ensure an accurate diagnosis before proceeding with treatment. Quality outcomes are assured by our dedicated team and extensive medical technology.

OUR SERVICES

Hand Surgery

- Endoscopic Carpal Tunnel Release
- Ganglion Cyst / Tumour Treatment
- Hand, Wrist, Forearm Fractures
- Sports Injuries
- Tendon, Nerve and Joint Injuries Treatment

- Tonsillectomy - Adults and Children
- Thyroid and Salivary Gland Surgery
- Tympanoplasty (Hearing Preservation Surgery)
- Vertigo and Tinnitus
- Voice and Swallowing Disorder

OUR KEY SPECIALITIES

SURGERY

The success of our surgical expertise lies in various factors – carefully crafted programmes, a multi-disciplinary team of specialists and medical technology. At Parkway East Hospital, we pride ourselves on two surgical techniques, namely the Minimally Invasive Surgery (MIS) and the Single Incision Laparoscopic Surgery (SILS).

Also known as laparoscopic surgery, MIS is a specialised surgical technique in which the surgeon uses miniature video cameras and fine calibre instruments to perform the surgery with several minute keyhole incisions. This benefits patients as there will be less trauma, blood loss and smaller surgical scars. They can also expect a shorter recovery period as opposed to conventional open surgery.

Parkway East Hospital is one of the first private hospitals in Singapore to use the SILS surgical technique. Unlike traditional laparoscopic surgery that requires three to four incisions, SILS uses only a single 2cm incision that is hidden deep inside the patient's belly button. This reliable technique gives immense benefits to patients, as they can now experience painless surgery, scar-free results, less postoperative pain, a lower risk of infection, faster recovery time and shorter hospital stay.

OUR KEY SPECIALITIES

WOMEN & CHILDREN

At Parkway East Hospital, we provide specialised and personalised care for women and children through obstetrics and gynaecological as well as paediatric services. Our spectrum of services starts from antenatal to postnatal care, tailored services for premature or ill babies and meeting their preventive, diagnostic and treatment needs. Our patients are ensured of quality care and services through our commitment in delivering a total patient care experience.

To provide new parents with a comprehensive guide to our services, complimentary maternity tours are conducted before their hospital stay to allow patients to get acquainted with our staff and facilities, thus making their stay with us a more comfortable one.

Our Maternity tour is conducted every Wednesday at 10am and Friday at 3pm (excluding Public Holidays). Please contact our Customer Service at 6340 8675 (during office hours) to book an appointment.

OUR SERVICES

General Surgery

- Bariatric Surgery (Laparoscopic Gastric Banding for Morbid Obesity)
